

SEPT. CHPT. NEWS BRIEF

From the President

Fellow fliers and aviation fans of Chapter 206!

We have the airport's 80th birthday upon us this Saturday! Many people have volunteered to fly Young Eagles and a few to help with the paperwork on the ground. For pilots who intend to start flying Young Eagles in the morning and those helping at the same time with paperwork, Ola Vestad says we should be at McAllister's at 8:30. If you want to eat a breakfast at the fund raiser for aviation scholarships, Dick Pingrey says they can start serving EAA volunteers over in his hangar at about 7AM. Please keep in mind that they will have runway 22/4 closed and taxiway Bravo from around Dick's hangar or a little further west perhaps on over close to McAllister's closed for exhibits and the public. We could use a couple of volunteers to help man an EAA information booth both morning and afternoon. I think that I will help get a couple of tables and a few chairs over to Dick Pingrey after school on Friday. I would also like to bring over our banner and some application sheets or such information if it is available in Tom McMahon's hangar or could be left there by Friday afternoon.

If any of you think that you can provide some exhibits of homebuilding

such as a piece of your project or a board with pictures of your project on it, that would be helpful to the public in understanding our unique hobby! Possibly some of you might have in mind to have your completed aircraft on display rather than flying Young Eagles. I am not sure who you talk to in order to find the area to park your pride and joy but I think that Dick Pingrey might have some ideas and if not, I think that Les Flue as a very involved member of the airport board would probably know.

Ola might not feel it necessary for pilots planning to fly Young Eagles to let him know in advance who is flying, when, and how many seats are available. He has run this so many times in advance.

I would appreciate hearing from you if you can help with the information booth.

Oh, a couple of last minute thoughts off of the subject of the Airport birthday. Our September meeting will be enjoying the hospitality of the hamburger BBQ at Dick Pingrey's/Randy Finger's hangar on Friday September 19, I think around 6PM. Be watching for updates. We will talk about October and the October 11th pancake feed very briefly on the 19th because it is not really a meeting, mostly a fun time!

Fly safely!

Stu
